INTRODUCTION

Based near the mountain bearing its name, which in ancient times signified a place for protection, Canik has become a leading firearm manufacturer worldwide in less than a decade. With a background in the manufacturing of high grade components for the aerospace industry, Canik has been able to meticulously develop and produce TP series striker fire, high quality polymer frame pistols. The Canik TP series pistols have proven themselves time and time again in intense accuracy, durability, and reliability tests, and have now become the service pistols of military and law enforcement forces around the globe as well as developing a cult following of civilian firearms enthusiasts.
PROVIDING SECURITY REQUIRES PROFESSIONALITY

In a life-threatening situation, your handgun may be the only factor that stands between life and death. With this in mind, Canik strives to meticulously design and manufacture high-quality and innovative handguns that will best serve our customers, be they military, law enforcement, or civilian, in every possible condition. Our TP series pistols stand as the culmination of all Canik's efforts to provide the best handgun one can rely on in any mission, competition, and home/self defense.

Canik TP series pistols. Superior handguns for life.
HOME & SELF DEFENSE

The TP family of full, compact and subcompact sized pistols chambered in 9 mm (LE preferred caliber), are ideal for home and personal defense uses. The TP series comes standard with features like low recoil, exceptional accuracy, excellent ergonomics, high magazine capacity, and the ability to mount a laser pointer or light under the barrel, and night sights or optics for engagements in dimly lit conditions.
The TP9 Elite Combat is a versatile compact pistol with performance upgraded parts designed by Salient Arms International in an industry-first collaboration. A SAI fluted and nitride-coated match-grade barrel, thread protector, sight set, and mag well have all been added to this firearm to truly make it one of a kind. The compact pistol has a polymer frame, is striker-fired, and has an optics-ready slide with four different interfaces* to accept the market’s most popular reflex sights. An included cocking lever can be mounted to either side of the slide for fast loading. Extensions for the magazine release catch and alternate backstraps are also included to enable an ideal fit. The pistol includes one 15-round magazine and one 18-round magazine with a +3 aluminum extension. Available in 9x19mm, the Combat has a Cerakote-over-Tenifer finish on the slide for long-lasting corrosion resistance. The internal firing control components are nickel plated for smooth operation and high performance. A patented holster, magazine loader, and cleaning kit all come standard in the package.

* TP9 Elite Combat Executive includes 1 optic plate

The TP9 Elite Combat (HG4617DV-N) and the TP9 Elite Combat Executive (HG4950V-N) are available with Vortex Viper Red Dot.
The TP9 SF Elite model is a medium-sized version of the TP series bearing the magazine capacity of 15 rounds. This model received the title of 'Elite' due to its ambidextrous slide stop, brand new design trigger safety mechanism, Warren brand fiber optic sights, closed striker cover mechanism, and the ergonomically enhanced shortened grip size. Its frame design is modified as compared with previous TP series, thus ensuring a flawless comfortable shooting experience. The trigger reach distance has been shortened on the Elite with an improved design of trigger safety, making this firearm ideal for all types and styles of shooters. The equipped Scott Warren design standard fiber optic fore-sight and blackened rear sight allows for rapid and accurate target transitions. All Elites come standard with a case, holster, a larger backstop, speed loader, and two Mec-Gar branded magazines.
TP9 DA is the solid choice for law enforcement agencies or any shooter who wants a gun in full size with both single and double action trigger mechanisms and the guarantee to deliver performance in the toughest conditions. The TP9 DA features a customizable ergonomic grip using interchangeable backstraps for greater control, comfort, and natural point of aim. The TP Series Pistols are the first polymer frame pistol of Turkish Police Force in service and have been torture tested multiple times with 50,000 rounds utilizing the original components only.

The revolutionary TP9 SA Mod.2 is a one of a kind self-defense handgun. The crisp single action trigger that Canik is known worldwide takes this pistol truly to the next level of performance. Interchangeable backstraps and aggressive serrations increase control and comfort. With its loaded chamber indicator and manual decocker/safety lever, TP9 SA Mod.2 is everything you desire in a self-defense handgun. The manual decocker/safety lever mechanism allows for disassembly without a trigger pull.
The smooth-shooting TP9 SF is a breakthrough in ergonomics for special operations use. A smooth single action trigger delivers accuracy and fast follow-up shots. Interchangeable backstraps and aggressive serrations ensure that the sculpted grip meshes comfortably into the operator’s hand for greater control. The TP9 SF model was designed for simplicity by removing the decocker and manual safety.
The TP9 Elite Sub Compact (SC) is the U.S. configuration of the TP9 Sub Elite which is especially customized for U.S. market. The TP9 Elite Sub Compact was developed to be the first sub-compact version of TP Series of pistols with a 3.60” barrel. The TP9 Elite SC offers the same features as the standard models and is designed to be snag-free for better concealment and faster draw. An advanced telescopic spring recoil management system, a double stack set up, front slide serrations, optics ready co-witnessing mount, a reversible IWB/OWB carry holster, 12 round magazine with finger rest, and a 15 round extended magazine all come standard in the case together with a magazine loader and cleaning kit.
